ADIKWU JOSEPH OCHIGBO

Software Engineer | FinTech & Risk Systems

Joegbo247@gmail.com | +44 (0)7553 692290 | Luton, LU1 3FA, UK | github.com/adikwu-joseph
adikwu-joseph.github.io

PROFESSIONAL PROFILE

Software Engineer with a First Class BSc in Software Engineering and over two years of hands-on FinTech experience at Monzo and TSYS EMEA. I bring a rare combination of technical capability and domain expertise in fraud systems, risk management, and financial compliance — skills that directly inform the secure, data-driven applications I build. Currently deepening expertise through an advanced Python Masters Programme (Data Science, Django, PySpark, AI) and contributing to RLHF AI training pipelines. I am not a career switcher learning to code — I am a FinTech professional formalising software engineering capability, with production-relevant knowledge of FCA regulations, GDPR, transaction data analysis, and risk systems built from day one.

TECHNICAL SKILLS

Languages	Python, Java, C#, JavaScript, HTML5, CSS3, SQL, JSON
Frameworks	Django, ASP.NET MVC, AngularJS, Bootstrap, jQuery, Windows Forms
Data & AI	Data Science, Machine Learning, Artificial Intelligence, PySpark, Python Statistics, Pandas, NumPy
Databases	MySQL, Microsoft SQL Server, SQLite — querying, design & administration
Web Dev	Full-stack web development, UI/UX for responsive design, Python web apps, .NET web apps
Methodologies	OOP, SDLC, Prince2 Agile, Scrum, Unit Testing, Debugging, Risk Management, Project Management
Systems & Networks	Linux OS, Windows Server (Exam 70-741 & 70-742), Network & Domain Administration
Tools & IDEs	Visual Studio, VS Code, Eclipse, Git, GitHub, Laragon
Productivity	Microsoft Office Suite, CRM systems, Vicidial

EDUCATION

BSc (Hons) Software Engineering — First Class | **University of Bedfordshire** *Sep 2022 – Jul 2023 · Luton, UK*

- Graduated with First Class Honours, demonstrating strong command of software design, algorithms, and engineering principles.
- Key modules: Object-Oriented Programming, Database Systems, Software Project Management, Web Development, Networks.

Advanced Diploma in Software Engineering — Distinction | **Aptech Computer Education** *Jan 2020 – Nov 2021 · Abuja, Nigeria*

- ACCP (Aptech Certified Computer Professional) programme — Distinction across all examined terms.
- Key subjects: HTML5, CSS3, Bootstrap, jQuery, AngularJS, UI/UX for Responsive Design, OOP, Java, C#, JSON, Linux OS, Cloud Computing, IoT, ASP.NET MVC, Windows Forms, Agile & DevOps, Python, MySQL, Python Web Development, Windows Server & Network Administration.

Python Masters Programme — In Progress | **Edureka (Online)** *2025 – Present · Remote*

- Comprehensive programme covering: Python Programming, Data Science with Python, Artificial Intelligence, PySpark, Python Statistics for Data Science, Django Web Framework, and Python Scripting.

BSc Physics Education | **University of Jos** *Sep 2011 – Jul 2018 · Jos, Nigeria*

- Developed strong analytical and research skills applied throughout technical and professional career.

PERSONAL PROJECTS

Remittance App · In Development

- Currently designing a remittance application to facilitate international money transfers, drawing directly on domain knowledge gained as a Fraud Investigator at Monzo and Fraud Analyst at TSYS EMEA.
- Planning to incorporate secure transaction flows, user authentication, and compliance considerations informed by FCA and GDPR exposure.

Smile Game · PHP, CSS, MySQL, Laragon *github.com/adikwu-joseph/Smile-Game*

- Built a full-stack browser-based game using PHP, CSS, and a MySQL database — demonstrating end-to-end web development skills.
- Implemented user authentication including signup, login, logout, and session management, alongside game logic, a home screen, and a game over screen.
- Applied database connectivity to persist user data, showing practical understanding of back-end architecture and server-side programming.

Password Manager App (PassVault) · React, TypeScript, JavaScript, CSS · University Group Project *github.com/adikwu-joseph/group-passvault*

- Contributed to a React + TypeScript password manager as part of a university group project, achieving a grade A for the module.
- Applied Prince2 Agile methodology throughout the project lifecycle, managing sprints, risk registers, and delivery milestones.
- Took on dual roles of Project Manager and Risk Manager within the team — coordinating tasks, identifying risks, and ensuring timely delivery.
- Gained hands-on experience with component-based architecture, TypeScript, and version control via Git and GitHub.

Gym Tracking App · Python, HTML/CSS, JavaScript

- Built a personal gym tracking application to log workouts, track progress, and manage exercise data across sessions.
- Applied Python for backend logic and data handling, with HTML/CSS and JavaScript for the front-end interface.

WORK EXPERIENCE

Fraud Investigator | Monzo *Jan 2024 – Present · London (Remote)*

- Investigated complex fraud cases by querying transaction databases and analysing patterns — directly applying SQL and data analysis skills.
- Produced detailed written reports and maintained compliance with FCA and GDPR regulations, sharpening documentation and technical communication abilities.
- Collaborated cross-functionally with other financial institutions, mirroring Agile team workflows.

Fraud Analyst | TSYS EMEA (Metro Bank) *Jul 2023 – Jan 2024 · Milton Keynes*

- Coordinated data extracts across multiple internal and external databases; applied structured querying to support lead generation.
- Utilised OSINT and third-party data tools to investigate card fraud and disputes — building skills transferable to security-focused software roles.

AI Model Trainer & Evaluator | Outlier *Freelance · Remote*

- Contributed to AI model training through Reinforcement Learning from Human Feedback (RLHF) — writing, reviewing and evaluating Python code and mathematical problem sets to improve model accuracy.
- Rated and assessed AI-generated responses across Python programming and mathematics tasks, applying technical knowledge to identify errors and improve output quality.
- Gained practical exposure to large language model (LLM) training pipelines and AI evaluation methodologies.
- Applied structured, logic-driven evaluation criteria to assess search algorithm outputs — analogous to software QA and testing processes.

Call Centre Agent | The Outsource Global *Jun 2020 – Jun 2021 · Abuja, Nigeria*

- Operated Vicidial CRM system; maintained 98% customer satisfaction rating through process-driven communication.

Executive Administrative Assistant | **Industrial Training Fund (NYSC)** *Dec 2018 – Dec 2020 · Abuja, Nigeria*

- Digitised and restructured filing systems, reducing document retrieval time by 70% — demonstrating early aptitude for systems thinking and process optimisation.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Python Developer Masters Programme (In Progress) — Edureka, 2025–Present. Courses: Python Programming, Data Science with Python, Artificial Intelligence, PySpark, Python Statistics for Data Science, Django Web Framework, Python Scripting.
- Programming for Everybody: Getting Started with Python — University of Michigan / Coursera (Completed)
- Prince2 Agile — applied methodology (University of Bedfordshire, Grade A)
- ACCP — Aptech Certified Computer Professional (Advanced Diploma, Distinction) — Aptech Computer Education, Nov 2021
- Compliance Training — FCA Regulations, GDPR (Monzo & TSYS EMEA)

ADDITIONAL INFORMATION

- Right to work in the UK
- Strong written and verbal communication skills; experienced delivering clear outcomes to non-technical stakeholders
- References available on request
